

Leverage Population Health Data to Improve Patient Adherence in Community Referral

Deliverable 3, Team Progress Report

Team Name: Devs on FHIR

Team Members:

Dhruv Saksena, dsaksena3, dsaksena3@gatech.edu (Dev)

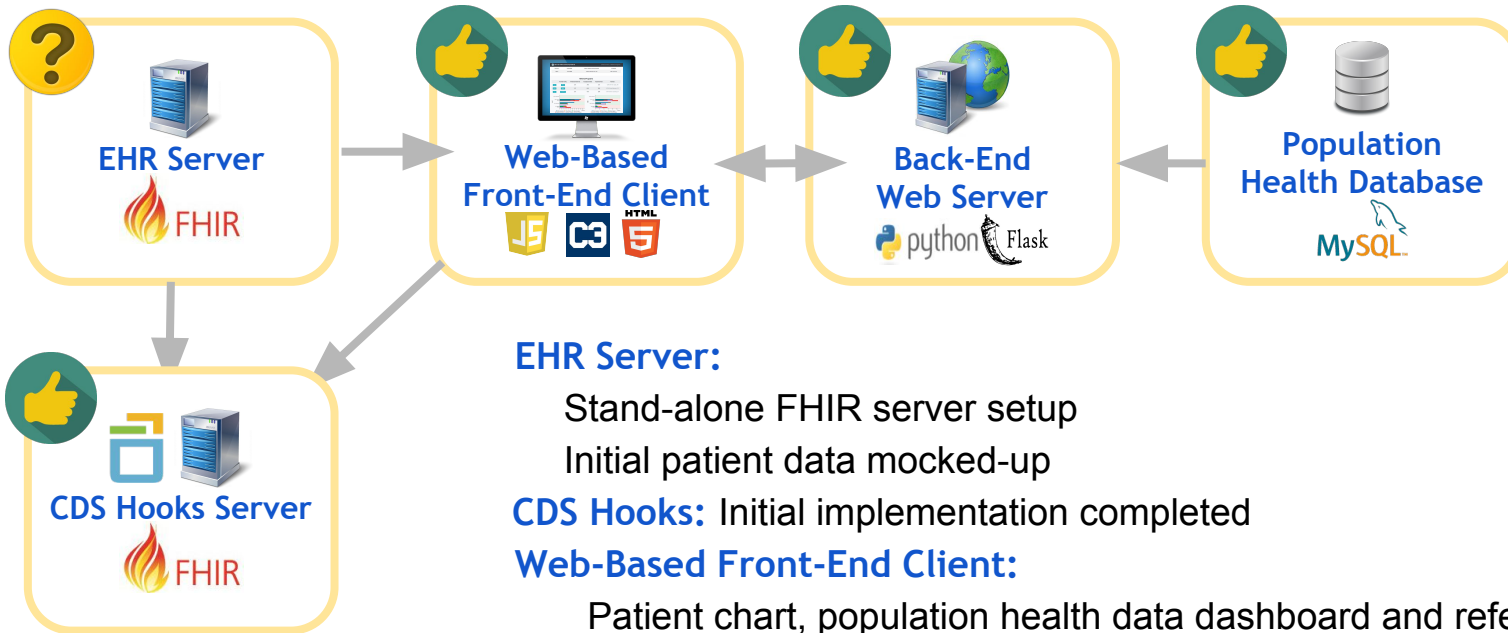

Elizabeth Coviello, ecoviello3, ecoviello3@gatech.edu (Dev, Narrator)

Venu Shankar, vshankar33, vshankar33@gatech.edu (QA)

Xia Lee, xlee6, xlee6@gatech.edu (PM)

Project Status

EHR Server:

Stand-alone FHIR server setup

Initial patient data mocked-up

CDS Hooks: Initial implementation completed

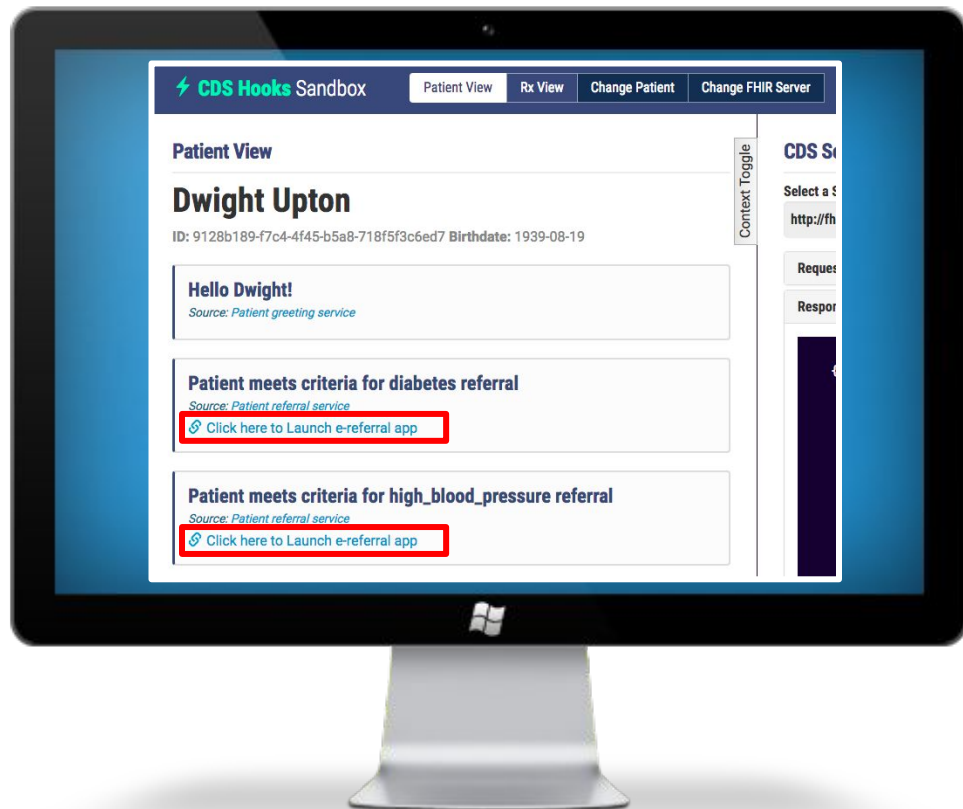

Web-Based Front-End Client:

Patient chart, population health data dashboard and referral form setup

Back-End Web Server: Flask environment setup

Population Health Database: Initial mockup data created

Application Screenshots

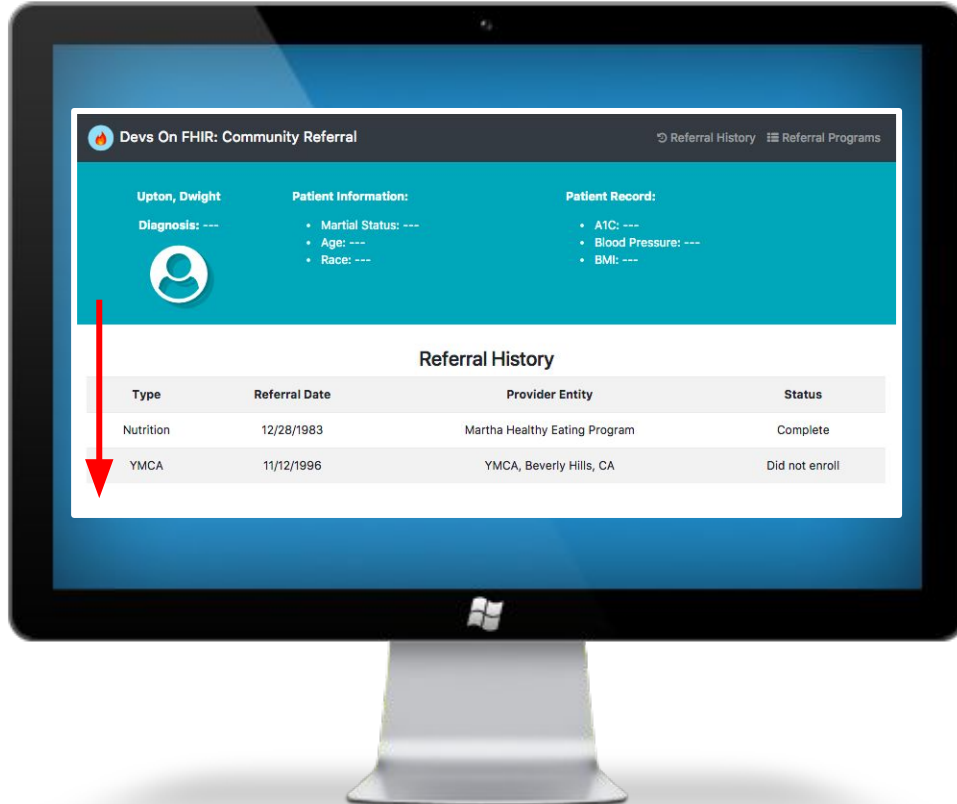

Sample EHR with CDS Hooks

(based on the CDS Hooks Sandbox project at <https://github.com/cds-hooks/sandbox>)

Application Screenshots

Community Referral Application (1)

- Patient information
- Patient referral history

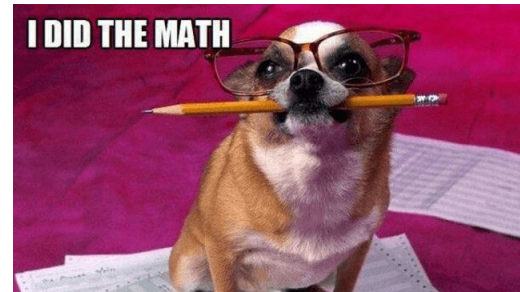

Application Screenshots

Community Referral Application (2)

- Referral program information
- Population health data results

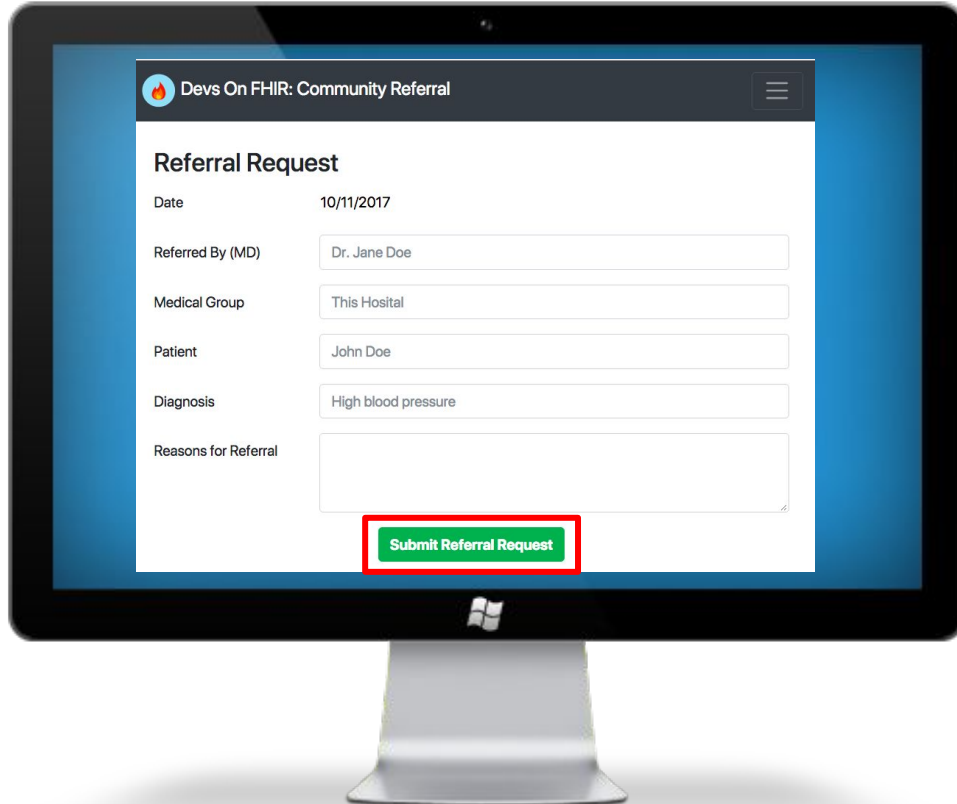

Application Screenshots

Community Referral Application (3)

Application Screenshots

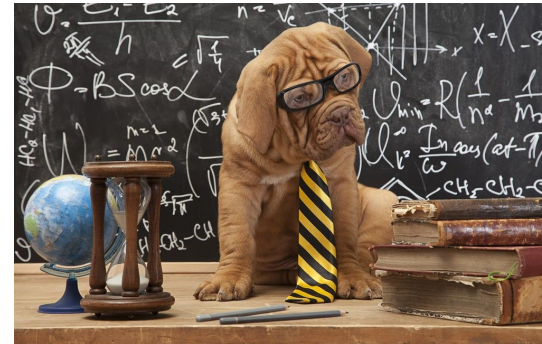

The screenshot shows a web application titled "Devs On FHIR: Community Referral". The main heading is "Referral Request". The form contains the following fields:

- Date: 10/11/2017
- Referred By (MD): Dr. Jane Doe
- Medical Group: This Hosital
- Patient: John Doe
- Diagnosis: High blood pressure
- Reasons for Referral: (Empty text area)

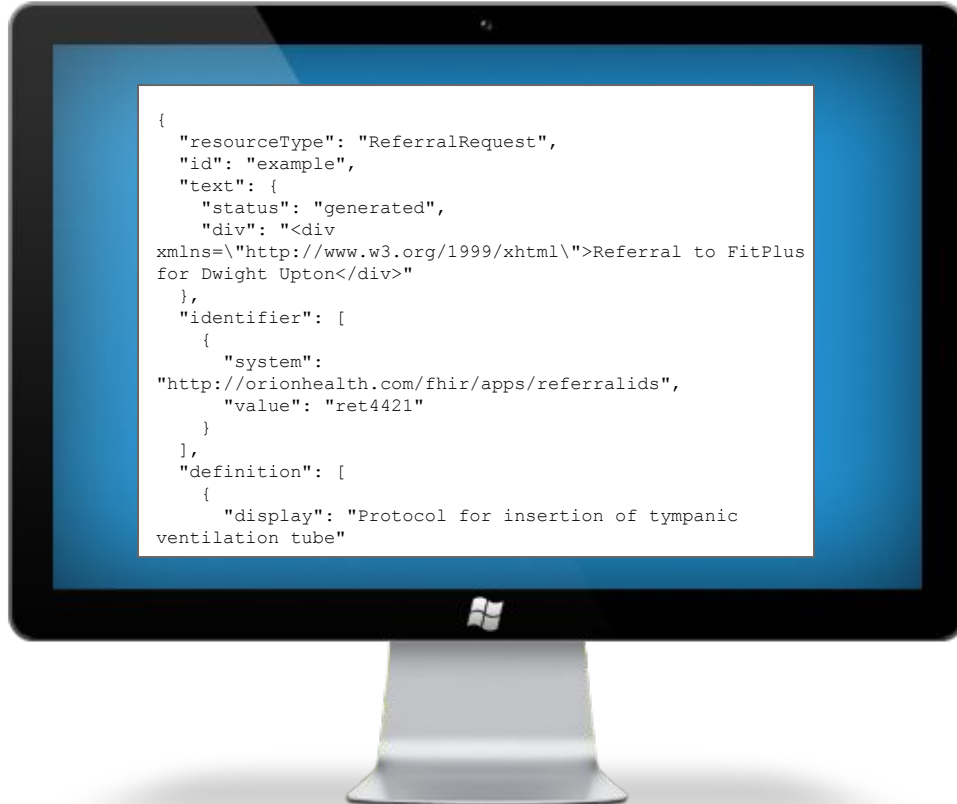

A green button labeled "Submit Referral Request" is highlighted with a red border at the bottom of the form.

Community Referral Application (5)

- Referral request form

Application Screenshots

Community Referral Application (6)

- FHIR ReferralRequest JSON Object

Outstanding Elements

FHIR Server: Complete patient data mocked-up

CDS Hooks: Test and refine implementation

Web-Based Front-End Client: Integration with server-side data

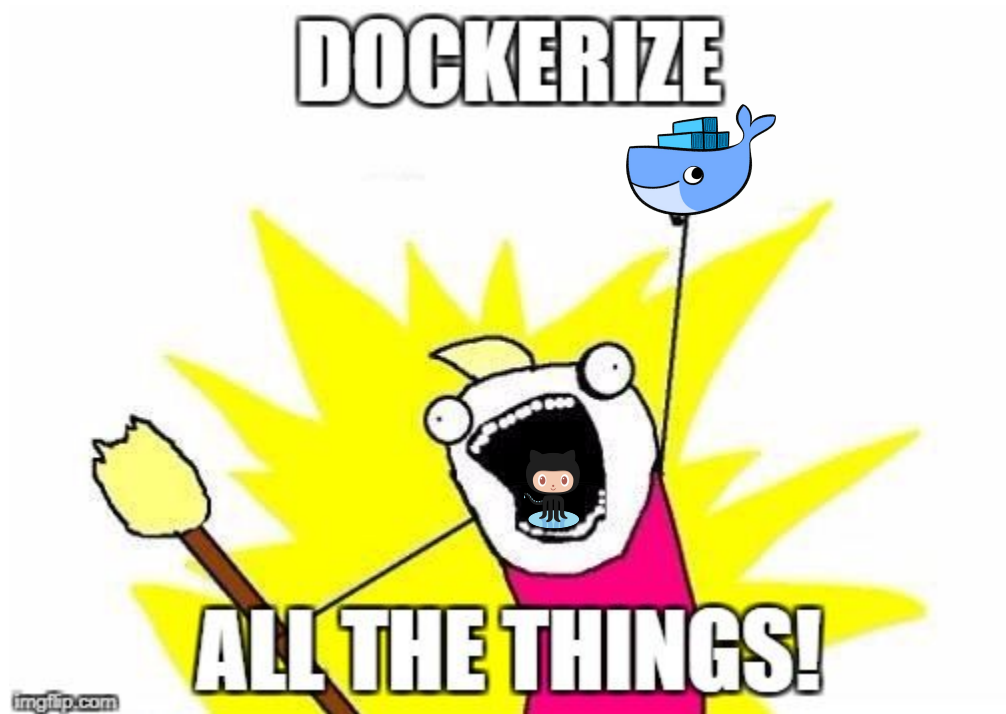

Back-End Web Server: Complete FHIR data pull and population health data selection logic

Population Health Dataset: Complete mockup data

Deployment Plan

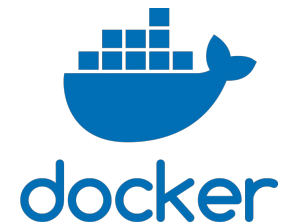

Project Plan: Gantt Chart

[illegible]

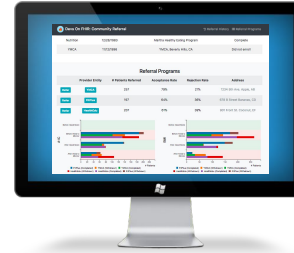

Further Research Done

Next Steps

Continue implementation and refinement:

- Client-side UI implementation
- Server-side application implementation
- Integration and testing

Additional Data:

- Patient and population health data mockup

Determine project submission method:

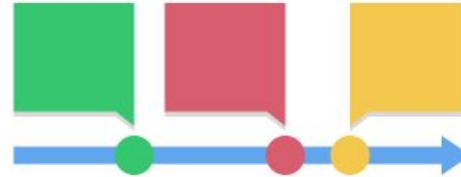

- Check with TA mentor for further input

Plan for Project Completion

Application implementation:

Complete implementation, test and refine!

Discussions with mentors:

Weekly discussions

Prepare for project submission:

Deliverable 4 and 5
